

The Restore Academy have partnered with Lewisham College to enable course attendees the opportunity to begin a rewarding career within the building restoration industry. The introduction to restoration course will give members the opportunity to learn basic repair and conservation techniques whilst gaining hands on experience on a live heritage project. All will be expected to follow site safety and working procedures to ensure a safe working environment. All attendees will undertake a site induction which will explain all safety measures and safe working practices. Some examples of the very interesting and historically significant/ prestigious buildings in and around London that have been worked on are The Houses of Parliament, The War Office, The Water Tower featured on Channel 4 Grand Designs and many more.

Pre-assessment: Monday 20th January 2025

Start date: Thursday 23rd January 2025

End date: Monday 3rd March 2025

Site Visit: Tuesday 4th March 2025

Interviews: Wednesday 5th March 2025

Location: Lewisham College, Lewisham Way, London, SE4 1UT

Academy objective

The Restore Academy wants to bring awareness to the many trades and careers available within the conservation industry. Buildings will always require maintenance, and the building restoration industry is in desperate need of diverse and dynamic restoration technicians to ensure our built heritage has a future. The Restoration Academy has created partnerships with a number of organisations, committed to offering interviews to all attendees for apprenticeships and work placements, for both technical and commercial roles. **They are very keen to receive applications from women as they are underrepresented in the industry.**
